

# Waiting for the night – Armin van Buuren

Shoot me down and I'll get up again  
Emotion running high with double meaning  
Just another day to keep it calm within  
But I can't find a way to fight this shadow dreaming

We're always waiting for the night  
Never lost, we can go where the light shines brightest  
We're always waiting for the night  
So come with me where we can go where  
The light shines brightest

Stay all night, runaway all night  
We'll stay all night runaway all night?  
Stay all night, runaway all night  
Stay all night, runaway all night

Push and shove against the thoughts you left me with  
Every picture of regret my expectation  
Your emotions can't hide behind those eyes  
Conversations come quick to steal me back again

We're always waiting for the night  
Never lost 'cause we can go where  
the light shines brightest  
We're always waiting for the night  
So come with me where we can go  
where the light shines brightest

Stay all night, runaway all night  
We'll stay all night runaway all night?  
Stay all night, runaway all night  
Stay all night, runaway all night
