

Let U Go – ATB

I've been to all the familiar places
I've been running like a sentence
Never begun
I've been looking for a way to let you know
I've got nothing left to fill the spaces
I've got nothing but a center coming undone
I've been doing circles and it shows
I've been to all the familiar places
I've been running like a sentence
Never begun
I've been looking for a way to let you know
I've got nothing left to fill the spaces
I've got nothing but a center coming undone
I've been doing circles and it shows
Every cloud in the sky
Every place that I hide
Tell me that I, I was wrong to let you go
Every sound that I hear
Every thought that I fear
Tell me that I, I was wrong
I was wrong to let you go
It's the little things that make you crazy
Like the thought of someone
Touching your skin
I can see you everywhere I go
You could be inside a sea of faces
It could be the rumor of your grin
Swimming in the river as it flows
Every cloud in the sky
Every place that I hide
Tell me that I, I was wrong to let you go
Every sound that I hear
Every thought that I fear
Tell me that I, I was wrong
I was wrong to let you go

Every cloud in the sky
Every sound that I hear
