

# Let U Go – ATB

I've been to all the familiar places  
I've been running like a sentence  
Never begun  
I've been looking for a way to let you know  
I've got nothing left to fill the spaces  
I've got nothing but a center coming undone  
I've been doing circles and it shows  
I've been to all the familiar places  
I've been running like a sentence  
Never begun  
I've been looking for a way to let you know  
I've got nothing left to fill the spaces  
I've got nothing but a center coming undone  
I've been doing circles and it shows  
Every cloud in the sky  
Every place that I hide  
Tell me that I, I was wrong to let you go  
Every sound that I hear  
Every thought that I fear  
Tell me that I, I was wrong  
I was wrong to let you go  
It's the little things that make you crazy  
Like the thought of someone  
Touching your skin  
I can see you everywhere I go  
You could be inside a sea of faces  
It could be the rumor of your grin  
Swimming in the river as it flows  
Every cloud in the sky  
Every place that I hide  
Tell me that I, I was wrong to let you go  
Every sound that I hear  
Every thought that I fear  
Tell me that I, I was wrong  
I was wrong to let you go

Every cloud in the sky  
Every sound that I hear
