

Ordinary Lives – Bee Gees

There'll be one small light
All over the world tonight
The search will go on for the one
It was love with no name and we glowed in
The sun
There was one small dream
Incredible highs and lows
What little we knew living ordinary lives
Made a dream for you, living ordinary lives
Ordinary people, living ordinary lives
Ordinary people, living ordinary lives
We were ordinary people, living ordinary
Lives
We were ordinary people, living ordinary
Lives
The clock on the wall keeps moving
Time stands still
No matter how the dice may fall
Someone else always gets to call the number
Say goodbye, cruel world
No pity, no pain tonight
Whatever the cost, all is lost
And if it's love with no name, then it's all
In the stars
Whether it's wrong or right
There's no one to blame, no lies
What else could we do living ordinary lives
Made a dream for you, living ordinary lives
We were ordinary people, living ordinary
Lives
We were ordinary people, living ordinary
Lives
We were ordinary people
What else could we do, living ordinary lives
Made a dream for you, living ordinary lives
We were ordinary people, living ordinary

Lives

We were ordinary people, living ordinary

Lives

We were ordinary people, living ordinary

Lives

We were ordinary people, living ordinary

Lives

We were ordinary people
