Ordinary Lives – Bee Gees

There'll be one small light All over the world tonight The search will go on for the one It was love with no name and we glowed in The sun There was one small dream Incredible highs and lows What little we knew living ordinary lives Made a dream for you, living ordinary lives Ordinary people, living ordinary lives Ordinary people, living ordinary lives We were ordinary people, living ordinary Lives We were ordinary people, living ordinary Lives The clock on the wall keeps moving Time stands still No matter how the dice may fall Someone else always gets to call the number Say goodbye, cruel world No pity, no pain tonight Whatever the cost, all is lost And if it's love with no name, then it's all In the stars Whether it's wrong or right There's no one to blame, no lies What else could we do living ordinary lives Made a dream for you, living ordinary lives We were ordinary people, living ordinary Lives We were ordinary people, living ordinary Lives We were ordinary people What else could we do, living ordinary lives Made a dream for you, living ordinary lives We were ordinary people, living ordinary

Lives

We were ordinary people, living ordinary

Lives

We were ordinary people, living ordinary Lives

We were ordinary people, living ordinary

Lives

We were ordinary people
