

No Happy Ever After – Bullet For My Valentine

Kill the disease
Break the machine
It's kill or be killed, there's no other way
Feel the release
Be the obscene
It's kill or be killed, there's no other way
So spit it out
Get it out of your system
Another massacre, but no one's a victim
We're sick, but not showing the symptoms
And no one wants to find
A cure for this illness
It's fight or flight, a time to reignite
So get it out, get it out of your system
A new refusal, another resistance
There'll be no happy ending
A story never told
No happy ever after
Who's gonna save us all?
There'll be no happy ending
How does it end? When will we ever know?
These words can't be left untold
Come shut this down
Don't show any mercy
Let's make it personal, make it sadistic
They're fucked
'Cause we ain't gonna lie down
Like armageddon, there's nowhere to run now
Kill the disease
Break the machine
It's kill or be killed, there's no other way
Feel the release (Feel the release)
Be the obscene
It's kill or be killed, there's no other way
There'll be no happy ending
A story never told

No happy ever after
Who's gonna save us all?
There'll be no happy ending
How does it end? When will we ever know?
These words can't be left untold
Your turn to die
Kill the disease
Break the machine
It's kill or be killed, there's no other way
Feel the release (Feel the release)
Be the obscene
It's kill or be killed, there's no other way
There'll be no happy ending
A story never told
No happy ever after
Who's gonna save us all?
There'll be no happy ending
How does it end? When will we ever know?
These words can't be left untold
There'll be no happy ending
(Words can't be left untold)
No happy ever after
(Words can't be left untold)
There'll be no happy ending
How does it end? When will we ever know?
These words can't be left untold
