

Let me trough – CG5

I want you to know,
The ebb and flow of my own show
From head to toe,
You will be scared,
And not prepared,
For what I have in store for you
I'm waiting for,
My curtain call
Before I storm right through the hall
Knock knock, who's there?
Are you prepared,
To finally meet your doom
Why do you close the door?
Come to me with open arms
There's so much we need to explore
I mean no harm
I sing my song all night long just for you
Please oh please, I'm on my knees, let me through
I sing my song all night long just for you
Please oh please, I'm on my knees, let me through
I, I understand,
You want to play,
But this is what I have to say
Your presence here,
Fills me with fear
That's the extent of my career
I don't know why,
You even try,
To sing me your dumb lullaby
No I can't flee, calamity
Is everywhere I turn
Why do you close the door?
Come to me with open arms
There's so much we need to explore
I mean no harm
I sing my song all night long just for you

Please oh please, I'm on my knees, let me through
I sing my song all night long just for you
Please oh please, I'm on my knees, let me through
I will not let you through my door
I will not let you settle the score
Oh no Oh no Oh no Oh no
The power, the power, the power
Oh no
