Virtual Sky – Ctrl-Alt-Del

When you do things,
That you enjoy
Reason is not,
What you're thinking of
Virtual skies
Hipnotize
When I purge the shells of real life
Virual skies
Crystallize
On the verge, verge of dream and lie
When you're alone click my name,
Enter the code I'll be there
When you're alone click my name,
Enter the code I'll be there
Virtual skies
Hipnotize
When I purge shells of real life
Virual skies
Crystallize
On the verge, verge of dream and lie
My name
My name
My name
My name
Virtual skies
Mesmerize
On the verge, you read between the lies
Virtual sky
Is in your eyes
You're looking for a trace of real life
When you're alone click my name,
Enter the code I'll be there
When you're inside leave your shame
Enter my code I'll be there
Feel you in my mind
Feel you in my mind
