

# Lives – Daron Malakian and Scars On Broadway

Everybody dance, when you dance, when you wanna dance  
When you wanna dance, you will get in a trance  
Everybody sees, what they see, what they wanna see  
Everyone believes what they never have seen  
Come with me let's go  
Where we trace back the lives that show  
You will never know, unless you come with me, let's go  
Everybody dance, when you dance, when you wanna dance  
When you start to dance, you will get in a trance

All of our lives we put up a fight  
Our heroes have died  
All of our lives we've known wrong from right  
Our people survived

Everyone get high, there's no need to justify  
Everyone get high, there's no need to justify  
We will occupy and we all know the reasons why  
We will occupy and we drink tea 'till we die  
Knowing something true, absolutely unbearable  
Knowing something true, that will change the world I know  
Everyone get high, there's no need to justify  
Everyone get high, there's no need to justify

All of our lives we put up a fight  
Our heroes have died  
All of our lives we've known wrong from right  
Our people survived  
All of our lives  
All of our lives  
All of our lives  
All of our lives we did what was right  
Our soul will survive

We are the people who were kicked out of history  
We are the people who exist in victory

You will deny, we will verify  
How long can you run  
You will deny, we will verify  
So it shall be done

Everybody dance, when you dance, when you wanna dance  
When you start to dance, you will get in a trance  
Everyone get high, there's no need to justify  
Everyone get high, there's no need to justify

All of our lives we put up a fight  
Our heroes have died  
All of our lives we've known wrong from right  
Our people survived  
All of our lives  
All of our lives  
All of our lives  
All of our lives we've put up a fight  
Survived genocide  
Survived genocide

Everybody dance, when you dance, when you wanna dance  
When you start to dance, you will get in a trance  
Everyone get high, there's no need to justify  
Everyone get high, there's no need to justify
