Gravity - DJ Fresh feat. Ella Eyre

All hands on the trigger All eyes on the gun They don't believe that we are Strong enough to hold on 'Cause I'm the only one to get you The only one to figure you out You're a place that I can go to A face I couldn't live without And nobody sees what we do Don't need anybody else around No matter what they told us Gravity won't hold us down Even gravity can't hold us Even gravity can't hold us down Even gravity can't hold us Not even gravity can hold us down 'Cause I'm the only one to get you The only one to figure you out You're a place that I can go to A face I couldn't live without And nobody sees what we do Don't need anybody else around 'Cause no matter what they told us Gravity can't hold us down Can't understand the logic Of how we came to be Or what we gaining from it That we should dare to dream 'Cause I'm the only one to get you The only one to figure you out And there's nothing left to go through Just look at where we are right now They'll never see it in the way we do 'Cause they'll never have what we have found It don't matter what they told us Gravity won't hold us down

Even gravity can't hold us down
Even gravity can't hold us down
Even gravity can't hold us
Even gravity won't hold us down
Gravity, gravity
And even gravity, gravity
Gravity, gravity
No, gravity, can't hold us down
Gravity, gravity
Not even gravity, gravity
Gravity can't hold us
Even gravity can't hold us
Even gravity can't hold us down
Can't hold us down
No
