## My Funeral - Dope

Now, As I lay here in the dark And I think back to the start I know some things have to end For the next one to begin I walk alone free at last I feel the pressure letting go From the very bottom of my soul Flash your bone From the past Light the ashes in the rain And fade away It's my funeral Welcome you home This is the end of the night So thank you for coming along My time has come I don't wanna leave you behind But this one I'll do on my own (INSTRUMENTAL) Now, As we stand two worlds apart The times hardened up my heart From a world of no regrets That I hope won't soon forget I walk the line On broken glass I let the passion take control Of the very bottom of my soul Cross the line. Fade to black Hold the candle to the flame And light the way To my funeral Welcome you home

This is the end of the night

So thank you for coming along My time has come I don't wanna leave you behind But this one I'll do on my own (INTRUMENTAL)

Oooh-ooh Ooo-Oooh O-Oooh

It's my funeral
Welcome you home
This is the end of the night
So thank you for coming along
My time has come
I don't wanna leave you behind
But this one I'll do on my own

This is the end of the night
So thank you for coming along
My time has come
I don't wanna leave you behind
(I don't wanna leave you behind)
But this is the end of the night
(NIGHT!)
IT'S MY FUNERAL!
(INTRUMENTAL)
IT'S MY FUNERAL!
