## We're Good - Dua Lipa

I'm on an island Even when you're close Can't take the silence I'd rather be alone I think it's pretty plain and simple We gave it all we could It's time I wave goodbye from the window Let's end this like we should And say we're good We're not meant to be Like sleeping and cocaine So let's at least agree To go our separate ways Not gonna judge you when you're with Somebody else As long as you swear You won't be pissed when I do it myself Let's end it like we should And say we're good No need to hide it Go get what you want This won't be a burden if We both don't hold a grudge I think it's pretty plain and simple We gave it all we could It's time I wave goodbye from the window Let's end this like we should And say we're good We're not meant to be Like sleeping and cocaine So let's at least agree To go our separate ways Not gonna judge you when you're with Somebody else

As long as you swear you won't be pissed

When I do it myself

Let's end it like we should And say we're good Now you're holding this against me Like I knew you would I'm trying my best to make this easy So don't give me that look, Just say we're good We're not meant to be Like sleeping and cocaine So let's at least agree To go our separate ways Not gonna judge you when you're with Somebody else As long as you swear You won't be pissed when I do it myself Let's end it like we should And say we're good
