

# Iceflower – Eisblume

The day flies hasty from the sky  
I watch the people walking by  
The loneliness grows a moment  
I wonder what you're hiding from  
The evening's changing color now  
Like a chameleon knows how  
Another shape as if to tell us  
That we can't feel safe here  
We know that in this time when  
The moon appears uncover by the clouds

## CHORUS:

We are like ice flowers  
We blossom in the night  
We are like ice flowers  
Beauty faded in the light  
We are like ice flowers  
Darkness is on our side  
Ice flowers blossom in the night

The day comes back  
We say goodbye  
The hard life staying in my eyes  
It's gray and cold the silence's gone  
I know we have to carry on

I'm longing for the nights disguise  
It comes to take away the lies  
Another shape as if to tell us  
That we can't feel safe here  
We know that in this time when  
The moon appears uncover by the clouds

## CHORUS:

We are like ice flowers  
We blossom in the night

We are like ice flowers  
Beauty faded in the light  
We are like ice flowers  
Darkness is on our side  
Ice flowers blossom in the night

Iceflowers

We are like iceflowers  
In the night

CHORUS:

We are like ice flowers  
We blossom in the night  
We are like ice flowers  
Beauty faded in the light  
We are like ice flowers  
Darkness is on our side  
Ice flowers blossom in the night
