

Rain – Eivor

There's a shallow river running down the hill
Moving softly through the valley where I live

When it rains

When it rains

When it rains the river runs so deep

When the water is clear and still

Like a mirror

I can see you on the surface of the river

When it rains

When it rains

When it rains the river runs so deep

In the rain

In the rain

In the rain

In the rain I weep

Where will I find you when I need you

My long lost friend?

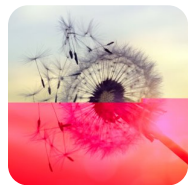

Bring back the mirror so I can see

Your face again

When it rains

When it rains

When it rains the river runs so deep
