

Bones – Equinox

Love is like a black hole
Everything is dark
You just gotta let go
And feel it, feel it, feel it
We fell off the deep end
Just to get a rush
You know that it's right when
You feel it, feel it, feel it

What is life if it's just of the earth
Only of the flesh and bones
Wanna thrive in the dust of the universe
And way into unknown

So I love beyond the bones
Goes deep inside your soul
I love beyond the bones
I love beyond the bones
I love beyond the bones

Wanna be the fire
Even if it burns
Offer up my fibers
To feel it, feel it, feel it

What is life if it's just of the earth
Only of the flesh and bones
Wanna thrive in the dust of the universe
And way into unknown

So I love beyond the bones
Goes deep inside your soul
I love beyond the bones
Goes deep inside your soul
I love beyond the bones
I love beyond the bones

I love beyond the bones

Into the unknown

Into the unknown

Where no other love goes

I love, I love beyond the bones
