Husavik - Fire Saga

Húsavík All by myself With this great, big world before me But it's all for someone else I've tried and tried again To let you know just where my heart is To tell the truth and not pretend All I needed was to get away Just to realize that I was meant to stay Where the mountains sing Through the screams of seagulls Where the whales can live 'cause they're gentle people In my hometown, my hometown Thought I made it clear, do I have to say it? It was always there, we just didn't see it All I need is you and me and my home Vera með þér, með þér Í Húsavík við Skjálfanda Í heimabær minn You want the world All the neon lights and billboards To be seen and to be heard And I followed you But now I know what makes me happy And I can tell you feel it too Where the mountains sing through the screams of seagulls Where the whales can live 'cause they're gentle people In my hometown, my hometown Where the northern lights burst out in colors And the magic nights surpass all others Pað eina sem ég þrái er , að vera með þér, með þér

Í Húsavík við Skjálfanda My home, my hometown
