

Young Like Us – Frans

Let's go

You may not see the consequences of your actions

And never think twice

Always thin ice

Make a statement, show yourself, show your attractions,nuh

Wouldn't that be nice?

My feet getting lighter, as the moon's getting brighter

Watching the stars fade away

To fulfil our desire, we go further and higher

To get what we want, oh

Did I mention you're pretty?

Let's get out of the city

Cos, we got a feeling, the night is young, young like us

Young like us

Let this night not be wasted

Trying something never tasted

Cos, we got a feeling, the night is young, young like us

Young like us

Never think about tomorrow, got no sorrows

We'll be fine, let's waste our time

Living in the golden age, make no mistake cos

When hearts align you know it's next to mine

My feet getting lighter, as the moon's getting brighter

Watching the stars fade away

To fulfil our desire, we go further and higher

To get what we want

Did I mention you're pretty?

Let's get out of the city

Cos, we got a feeling, the night is young, young like us

Young like us

Let this night not be wasted

Trying something never tasted

Cos, we got a feeling, the night is young, young like us

Young like us

Cos, we got a feeling, the night is young, young like us

Young like us, young like us

Watching the stars

(Young like us)

Fade away

(Young like us)

To get what we want, oh

Now, did I mention you're pretty?

(Young like us)

We got a feeling the night is young

Young like us, young like us

(Young like us)

Young like us
