

The Astronaut – Jin (BTS) Feat. Coldplay

You and me
We'll go down in history
The greatest story ever
One for the centuries
I saw you I was broken open
Tore right into two
I never saw anything as beautiful as you
If I woke up and all this was just a dream
I want to tell you just what you mean
When I'm with you
There is no one else
I get heaven to myself
When I'm with you
There is no one else
I feel this way I never felt
You and me
We'll go down in history
In these lives together
Somethings are meant to be
I saw you I was broken open
Tore right into two
I never saw anything as beautiful as you
If I woke up and all this was just a dream
I want to tell you just what you mean
When I'm with you
There is no one else
I get heaven to myself
When I'm with you
There is no one else
I feel this way I never felt
I feel this way I never felt
When I'm with you
There is no one else
I get heaven to myself
When I'm with you
There is no one else

A light
A sparkle in your eyes
Heaven coming through
And I love you
And I love you
And I love you
And I love you
And I love you
And I love you
