Tidal Waves (Saved) – Lennon Stella

I'm out here, alone and treading water The clear air, tells me there's a storm coming I'm not afraid of the dark cloud, gonna wait it out Got me racing my heart now and I'm fading out I'm waiting to be

Saved By a tidal wave Take me away t-t-take me away Saved By a tidal wave Take me away t-t-take me away I'm caught up in the current Knowing that I'm certain to be Saved Knowing that I'm certain to be Saved Knowing that I'm certain

I'm out here, like a message in a bottle Can't breathe, I'm sinking down to rock bottom I'm not afraid of the dark cloud, gonna wait it out Got me racing my heart now and I'm fading out I'm waiting to be

Saved By a tidal wave Take me away t-t-take me away Saved By a tidal wave Take me away t-t-take me away I'm caught up in the current Knowing that I'm certain to be Saved Knowing that I'm certain to be Saved Knowing that I'm certain

I'm losing hope When will you find me, when will you show up When will you show up When will you show I need to know that I'll be Saved By a tidal wave Take me away t-t-take me away Saved By a tidal wave Take me away t-t-take me away I'm caught up in the current Knowing that I'm certain to be Saved Knowing that I'm certain to be Saved
