Survive - Performance by Autumn Miller - Madilyn Bailey

All the way down, finding my way around Stars and night to cover me Back and forth searching for my way north Unbroken ground I'm wandering

Love is around, love is around baby Tryna get out, tryna be found and maybe I've gotta get lost to get where I'm going

Like roses we're only here for a moment Ashes to ashes, Mountains will always need to be climbed But we only go one foot at a time

Our voices tryna be more than just noises Echo to echo, Nobody gets to leave here alive Don't just survive, don't just survive

Heaven and hell dancing inside myself Music plays like a symphony Eb and flow, battles they come and go There's calm inside the catastrophe

Love is around, love is around baby Tryna get out, tryna be found and maybe I've gotta get lost to get where I'm going

Like roses we're only here for a moment Ashes to ashes, Mountains will always need to be climbed But we only go one foot at a time

Our voices tryna be more than just noises Echo to echo, Nobody gets to leave here alive Don't just survive, don't just survive Nobody gets to leave here alive Don't just survive, don't just survive
