

Better Things – Massive Attack

Don't drag me down Just because you're down
And just cause you're blue Don't make me too
Although you've found Beauty more than me
Don't talk to me About being free
That's freedom without love
And magic without love
Magic without love

Here we're safe Better things will surely come our way
Here we're safe Better things will surely come our way

You say the magic's gone Well i'm not a magician
You say the spark's gone Well get an electrician
And save your line about needing to be free
Ah, that's bullshit babe You just won't let it be
You want freedom without love
And magic without love
Magic without love
Yeah

Here we're safe Better things will surely come our way
Here we're safe Better things will surely come our way
