Enter The Dreamland - Meresha

The night is yours

Open the door and

Enter the dreamland

Taken up by the moonshine

Our bodies they collide

Tonight

One heart beats in the sky

As we take on a new mind

Our bodies ignite

All night

One heart beats in the sky

The night is yours

Open the door and

Enter the dreamland

Enter the dreamland

Suddenly we appear

In a new atmosphere

Where time

Ceases to define

What is behind the keyhole

Let our imagination

Control

One heart beats for it all

The night is yours

Open the door and

Enter the dreamland

Enter the dreamland

And there is nothing that we can't explore

Taking us by the hand the universe goes

The night is yours

Open the door and

Enter the dreamland

Enter the dreamland

Enter the dreamland
