## Timekiller - Project Pitchfork

Go away leave me alone

I feel your presence in my mind

The time seems to stop

I set you free

You calm my mind

You calm my mind

Make my dreams come true - baby

Every time it seems to me

That fiction and reality

Melt together for eternity

Liquid words dropping down the stairs

Filling the emptiness with sense

You and me on the floor

Floating on our sensibility

You need a timekiller

And you don't understand

I am like quicksand

Lick it from my hand

I am your timekiller

I let your mind expand

I am like quicksand

Lick it from my hand

Tick tock tick tock

Madness comes tonight

What's reality compared to me

I rest on the bed

And I'm sure I slowly get mad

I'm in a state of mind

Which makes me blind

For the fact that I'm a man

I'm here to stay forever

But not today

You need a timekiller

And you don't understand

I am like quicksand

Lick it from my hand

I am your timekiller I let your mind expand I am like quicksand Lick it from my hand You need a timekiller And you don't understand I am like quicksand Lick it from my hand I am your timekiller I let your mind expand I am like quicksand Lick it from my hand In my heart is no place for you And in my mind is no space for you The exit already melted away And now there's nothing left to say You need a timekiller And you don't understand I am like quicksand Lick it from my hand I am your timekiller I let your mind expand I am like quicksand Lick it from my hand You need a timekiller And you don't understand I am like quicksand Lick it from my hand I am your timekiller I let your mind expand I am like quicksand

Lick it from my hand
