

Free Fall – Slot Machine

I close my eyes
Hope to see the beauty of darkness
To let my heart
Settle for the lights in your eyes
I might fall from way across the sky
It might hurt but I will be fine
The ground might break
So I'll close my eyes cause I know I'll
Wake up in your arms
If the world is falling apart
It'll never take what's in our heart
Make it last
Just close your eyes ready to fly
I'll do the same right by your side
Free Fall
I don't care where gravity is taking us
High and low
Jump off this earth
Let's dive into the unknown
If we fall from way across the sky
I'm so sure that we will be fine
And if this is the last day of mine
I just wanna hold you in my arms
If the world is falling apart
It'll never take what's in our heart
Make it last
Just close your eyes ready to fly
I'll do the same right by your side
Free Fall
No safety nets no regrets no hesitation
I know you'll save me when I fall
If the world is falling apart
It'll never take what's in our heart
Make it last
Just close your eyes ready to fly
I'll do the same right by your side

If the world is falling apart
It'll never take what's in our heart
Make it last
Just close your eyes ready to fly
Free Fall
Leap of faith is all we've got
Now I'm ready to freefall
