

Modern Talking – Thomas Anders

I'm checkin' my phone, my Facebook account
I got the world in my hands
I know what's up on the right side of town
Always in touch with my friends
Flightmode is on,
On my way to cloud number nine
If this is wrong, I don't wanna be right
Modern talking, communication
Come on, let's connect the nation
Modern talking, come together
We can make it last forever
Modern talking, communication
Come on, let's connect the nation
Modern talking, come together
We can make it last forever
Never alone 'cause my friends are around
Every day, every night
Sending the message all over the world
I see the screen, I'm alright
Surfing the world, I can feel this new energy
This is my time I just wanna be free
Modern talking, communication
Come on, let's connect the nation
Modern talking, come together
We can make it last forever
Modern talking, communication
Come on, let's connect the nation
Modern talking, come together
We can make it last forever
Modern talking, communication
Come on, let's connect the nation
Modern talking, come together
We can make it last forever
Modern talking, communication
Come on, let's connect the nation
Modern talking, come together

We can make it last forever
Modern talking, communication
Come on, let's connect the nation
Modern talking, come together
We can make it last forever
