

Paradise Is Here – Tina Turner

You say you want to live some
Move out into the fast lane
You say you need excitement
To make you come alive
Some place a millions miles from
The shadows that surround you
I look for your attention
You`re lost out in the future
Where lovers ask no questions
And shadows never fall
Some pilgrim bound for paradise
No compromise
But paradise is here
It`s time to stop your crying
The future is this moment
And not some place out there
Tonight i need your love
Don`t talk about tomorrow
Right now i need your loving
Right now give it to me
Right now i want your loving
Right now - now now now
You talk about your new plans
To move on up the stairway
You dream about the highlife
That`s waiting for you there
A world of fame and fortune
That`s just around the corner
But i don`t need no high life
To make me feel a woman
And i don`t need to reach for
No castles in the sky
Just put your arms around me
Devour me
'Cos paradise is here
It`s time to stop your crying

The future is this moment
And not some place out there
Tonight i need your love
Don`t talk about tomorrow
Right now i need your loving
Right now give it to me
Right now i want your loving
Right now - now now now
