Finality – Woods Of Ypres

When we all have gone To the silence of eternity To first be forgotten And lost in the records of the earth Could I still miss you then, In the time and space after life When no one is searching anymore And where we are nowhere To be found We didn't spend our life together And I will miss you forever The choice was mine To long for a time, That will never come Though we leave the world apart, I still went peacefully, quietly, With you, still, firmly In my heart And I will wait forever I wait
