

# Uncover – Zara Larsson

Nobody sees, nobody knows  
We are a secret, can't be exposed  
That's how it is that's how it goes  
Far from the others, close to each other

In the daylight, in the daylight  
When the sun is shining  
On the late night, on the late night  
When the moon is blinding  
In the plain sight, pain sight  
Like stars in hiding  
You and I burn on, on

Put two and together, forever will never change  
Two and together will never change  
Nobody sees, nobody knows  
We are a secret, can't be exposed  
That's how it is, that's how it goes  
Far from the others, close to each other  
That's when we uncover, cover, cover  
That's when we uncover, cover, cover

My asylum, my asylum is in your arms  
When the world gives heavy burdens  
I can bear a thousand times  
On your shoulder, on your shoulder  
I can reach an endless sky  
Feels like paradise

Put two and together, forever will never change  
Two and together will never change  
Nobody sees, nobody knows  
We are a secret, can't be exposed  
That's how it is, that's how it goes  
Far from the others, close to each other  
That's when we uncover, cover, cover

That's when we uncover, cover, cover

We could build a universe right here  
All the world could disappear  
Wouldn't notice, wouldn't care  
We can build a universe right here  
The world could disappear  
I just need you near

Nobody sees, nobody knows  
We are a secret, can't be exposed  
That's how it is, that's how it goes  
Far from the others, close to each other  
That's when we uncover, cover, cover  
That's when we uncover, cover, cover  
That's when we uncover
